

Control System

AL-SO

Audible & Visual Annunciators

INSTALLATION INSTRUCTIONS

THIS PACKAGE INCLUDES:

1. Audible & Visual Annunciators:

- (1) Mini Strobe Siren,
- (2) Mounting Screws,
- (2) Wall anchors;

1. GENERAL DESCRIPTION

The **AL-SO** is a compact warning device that provides both audible and visual indication for alarm and security system applications.

Operating on 12VDC/24VDC, it integrates a piezo siren and flashing LED strobe in one unit to deliver effective notification in a wide range of environments. Its rugged, weather-resistant construction supports both indoor and outdoor use, while the simple 2-wire connection and flexible mounting design allow for quick and convenient installation.

This product is suitable for use with alarm panels, access control systems, and other low-voltage signaling applications.

2. SPECIFICATION

Lens Color	RED
Voltage	12V/24VDC
Current Draw	60mA@12VDC
Siren	100dB@1m, 12VDC
Connections	RED, Positive, Black, Negative
Working Temp	-20~70°C
Dimensions	73x127x44 mm

3. AUDIBLE & VISUAL ANNUNCIATORS AL-SO MOUNTING

1. Consider the type of mounting and where to run the wires. The two power connector from the lower part of the device back but also with a notch at the bottom to allow for hidden or exposed wiring.
2. Run two wires from MDC24 Controller Siren(12VDC) + & - to the Annunicator installation location. **Wet contact**
3. For surface mounting, mark and drill the mounting holes and holes for the wiring if needed.
5. Use the included mounting screws (and plastic wall anchors if needed) to mount the device taking care not to crimp the wires.

NOTE: The Audible & Visual Annunciators mounting holes are spaced so that it can also be mounted to a standard single-gang back box.
